## ***Water conservation facilities available in the Institution (2022-23)***

The college gets regular water supply from Panvel Municipal Corporation. It is used for drinking, canteen, bathroom and ground flowers.

On rainy days, rainwater falling on the roof of the college is properly brought to the ground through pipes. The required amount of water is given to the flowers and various plants next to the college.

The idea is to store this water in a large tank in the future. In case of heavy rainfall, the excess water is removed by proper drainage.

Water is used sparingly in summer. Flowering plants are fed directly through pipes so that water is not wasted. Sewage is also used to supply flowering plants from time to time. The idea is to do drip irrigation in the future.
