Code of Ethics in Research

An ethics policy is designed to help researchers and supervisors resolve any research-related issues. The researcher must respect the confidentiality, autonomy, diversity, values and dignity of his subject. The researcher needs to be very careful when publishing information, while protecting the privacy and confidentiality of the source of information.

Our college is bound to adhere to the Code of Conduct and Ethical Research Policies. The Research and Development Cell of the college has formulated a code of conduct to check malpractice and plagiarism in research work done by faculty and research students in accordance with UGC and University norms. The Research and Development Cell protects the rights, safety, dignity and welfare of research participants and investigators. Management of ethics in research is the main function of the research and development Cell in the college.

- Research Scholars should conduct their research work in accordance with the policies and regulations of the UGC, University and College.
- All research scholars should ensure that the research activities undertaken are in compliance with the provisions of the Higher Education Institutions Regulations- 2018 on Promotion of Academic Integrity and Prevention of Plagiarism framed by the UGC.

Principles of Ethics in Research: -

The college is committed to the following important principles related to the values of the vision and mission of the college.

1. All researchers must always adhere to the highest principles of honesty and integrity.
2. Researchers must respect themselves, their colleagues, the professional and academic community, society and nature.
3. There should be no bias contamination in the research work methodology, data analysis and data interpretation outline.
4. To promote plagiarism free research, access to Urkund and Turnitin –
